THE CHAMCLAD WAY

ChamClad exterior and interiors walls, soffit and ceiling panels are transforming architectural design and building practices across North America.

Our Canadian made product is designed to be the ideal product choice for applications requiring durability, low maintenance and easy installation – with no special tools required.

Our films have 35 years proven performance in the EXTERIOR industry and offer the most realistic woodgrains, metallic, and anodized finishes on the market. Additional benefits include superior UV protection and weathering resistance, colour stability, low heat buildup, and scratch and graffiti resistance.
