Temp/Humi Sensor

Introducing Swidget.

Swidget manufactures the only modular, future-proof smart devices in the global market today.

Swidget's modularity means the builder doesn't have to guess what smart technology their buyers want. Instead, they install a Swidget device (outlets, switches) just like any non-smart device and offer their buyers a "smart ready" solution. The buyer then selects their preferred smart functionality and snaps Swidget's smart insert into the device.

Swidget is future-proof so buyers can easily upgrade when technology changes without having to pay an electrician to install a new device. Today it's Wi-Fi and Z-wave, tomorrow it's 5G and Wi-Fi 6. Swidget keeps pace with rapidly changing technology so builders don't have to.

Additionally, Swidget devices have current sensors that monitor power consumption accurately and in real-time.* These energy use insights provide important notification alerts such as:

- Power On
- Over Limit Consumption
- Lost Connection
- Power Out

Swidget is the smart choice for energy-conscious builders and buyers who want maximum smart home flexibility, to save money and be environmentally responsible!

**Contact manufacturer for more information on how to monitor power with the Auxiliary Control Switch at support@swidget.com.*

“Work smarter not harder.”

-Allan Mogensen

Swidget makes living your best life easier.

You don't need to be an expert or spend a fortune to experience the benefits of living in a smart home. Swidget provides you with an easy and affordable solution that gives you control, comfort, convenience and peace of mind all while saving you time and money.
