

Strength and Shade.

Extend your living space while staying cool and dry under a solid roof pergola. R-SHADE's insulated panels help keep the temperature down and integrated gutters to wash the water away. We'll custom engineer a design, whether you want it mounted to your building or built as a freestanding unit. You can add a fan or LED lighting underneath, screens on the sides and even solar panels on top of your pergola to produce your own green energy. And like all our products, it's built for the elements — so you can rest easy.

-  Insulated fixed panels to regulate the temperature
-  Full extruded integrated gutters keep you dry and keep drainage out of sight
-  Durable aluminum provides the strength you need to protect you and your surroundings
-  Concealed hardware provides the finish you deserve
