

Developers + Builders

Hey there,
We love what
you're about.

Thanks for your time.

A little about us: we're a Texas-based company who, only a few years ago, set out to disrupt what's been an antiquated and outdated industry: pools.

We developed a range of precast, prefabricated concrete plunge pools, that have become affectionately known as Plungies.

Our Plungie is an award-winning, world-first product that's pioneering the future of swimming pools; bringing the fastest, easiest and highest quality concrete pools to the market.

We're all about creating spaces that bring people together — much like yourselves, which is why we're thrilled to introduce our products.

They're not just an innovative product solution, they're a revolutionary process solution; giving you more control as the builder.

By deconstructing and re-engineering the concrete pool building process, we've streamlined both production and on-site build times.

As the supplier, we can have a ready-to-swim pool delivered with a lead time as little as two weeks, which gives you total control as the builder.

Our pools can be installed fully in-ground, above-ground and anywhere in between.

**A pool in days,
not months.**

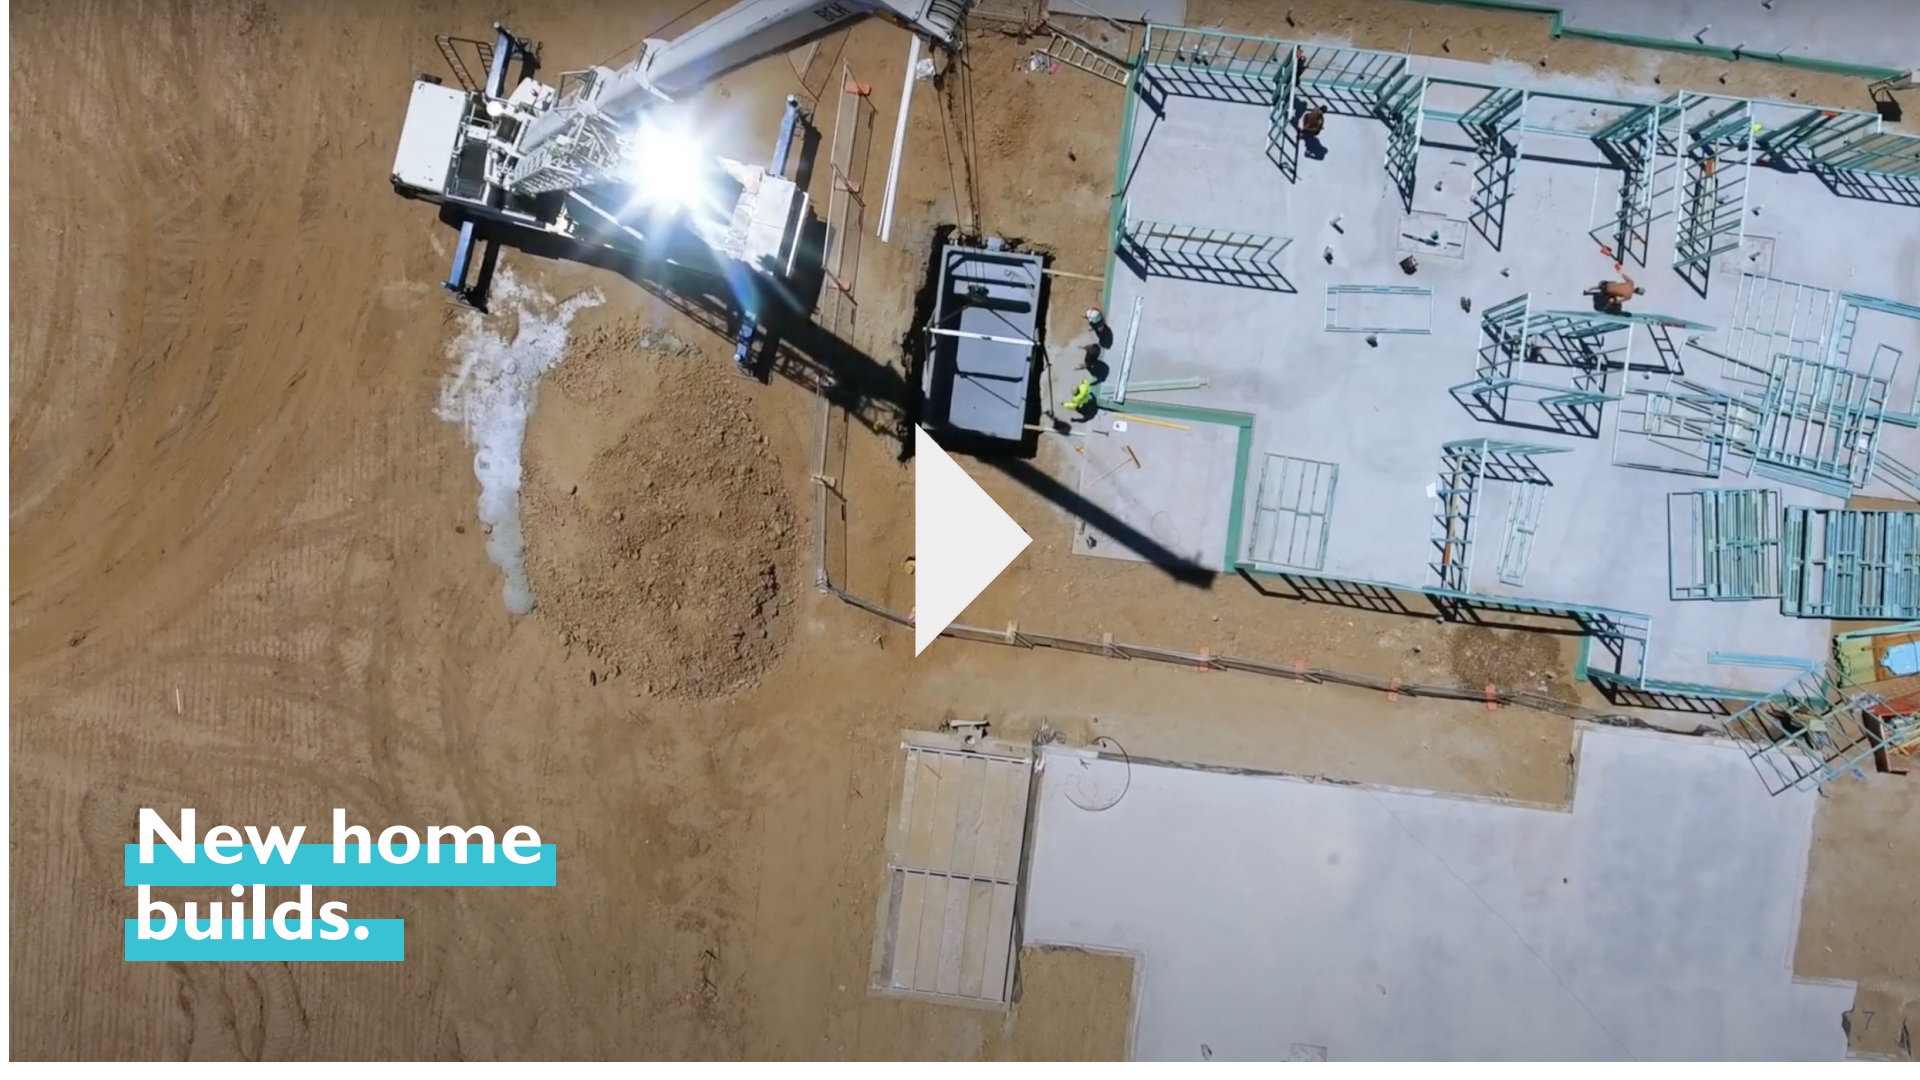

The Plungie Process.

**The builders,
renovators and
home improvement
enthusiasts pool
solution.**

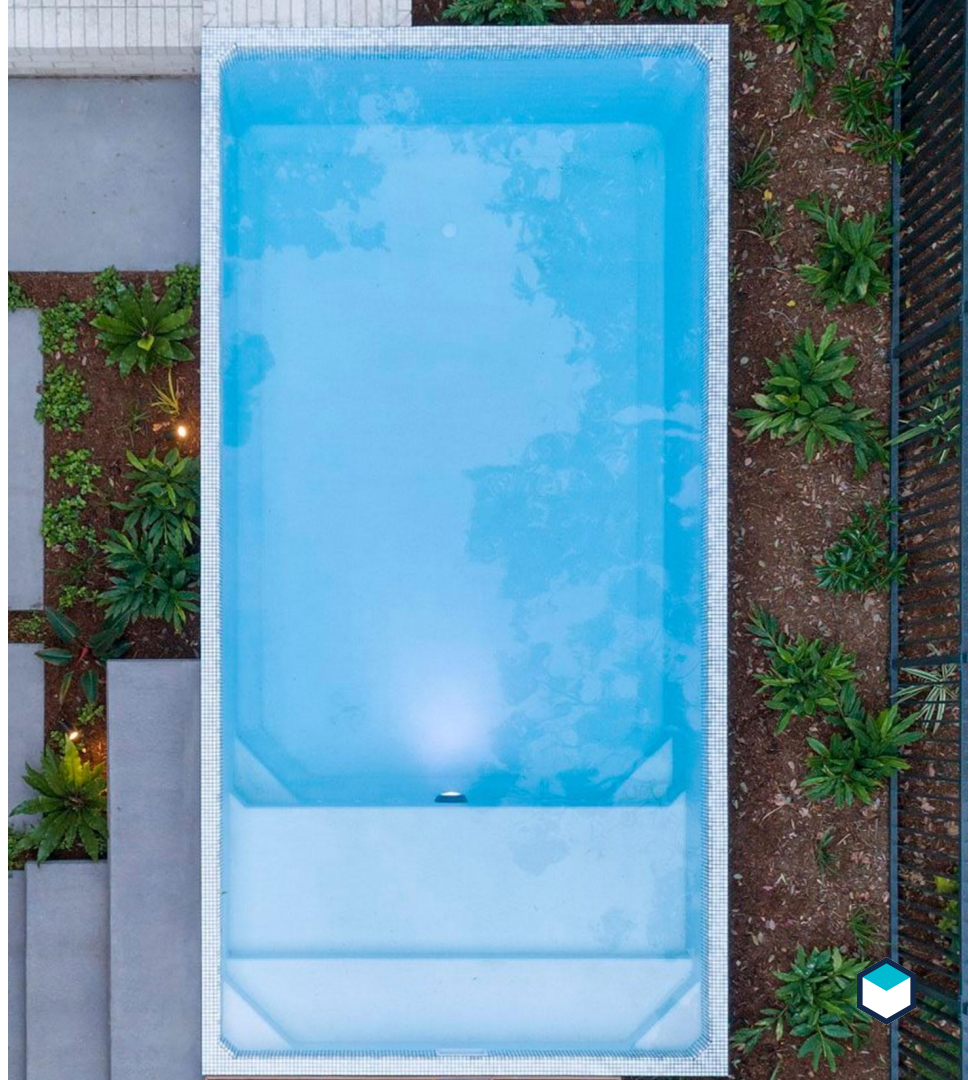

**New home
builds.**

Max

The world's largest monolithic precast concrete swimming pool, our 20'x10' delivers style by way of design and functionality.

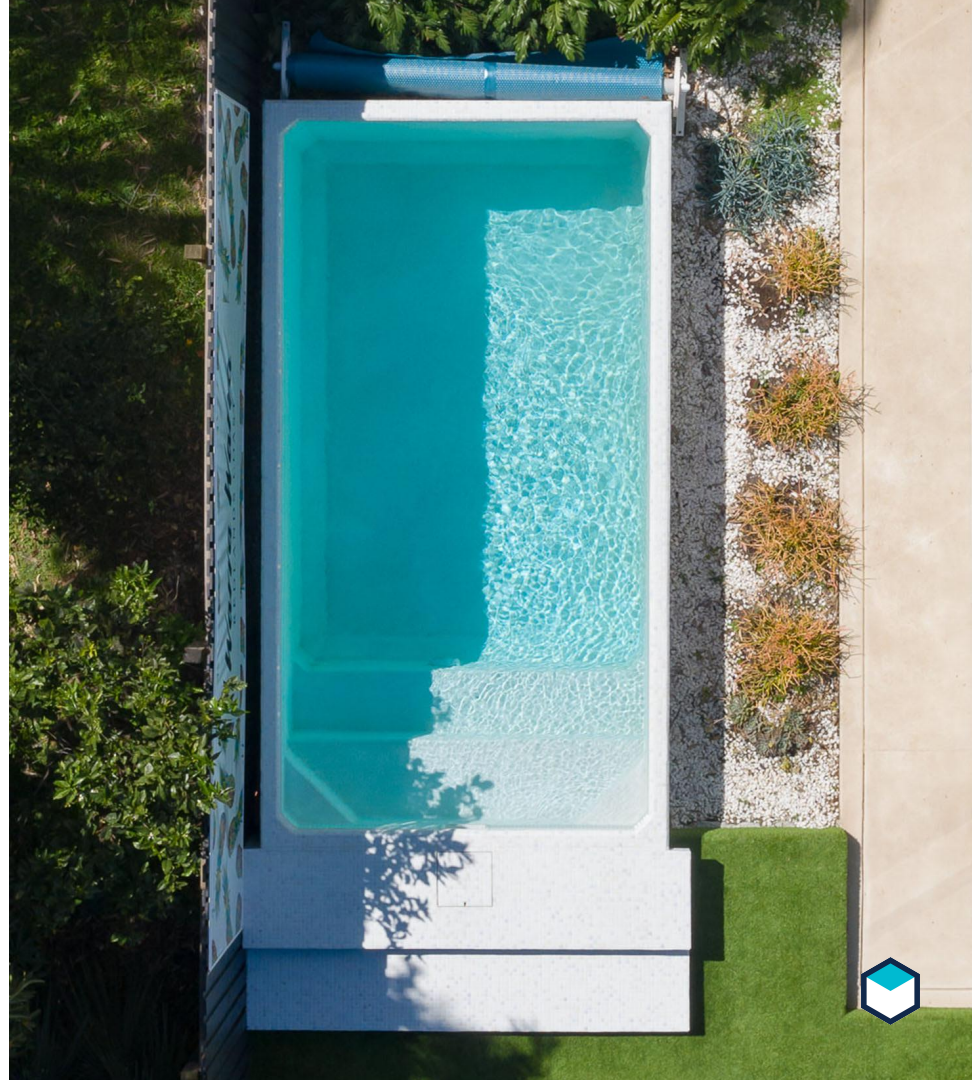

Length	20ft
Width	10ft
Height	5.5ft
Volume	26,000lbs
Bench space	43sq ft

Inclusions

Our pools are completely functional from manufacturing right through to transportation and installation.

We want your experience purchasing a Plungie to be as easy as possible, which is why they're supplied with pre-constructed fittings, complete and ready to install – or as we like to say, 'ready to swim'.

To ensure onsite works are minimal, fast and cost-effective, the following inclusions are standard:

- Highly engineered concrete pool shell
- High-performance ecoFinish interior
- Multi-colored LED light
- Skimmer box
- Pre-plumbed and fitted filtration, safety suction and heating line provisions
- Technical designs and pre-engineered specifications for ease of building approvals

GUARANTEED FOR 10 YEARS

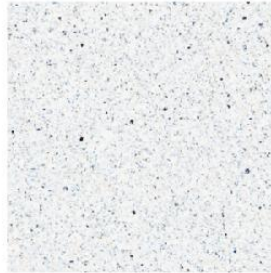

ecoFINISH

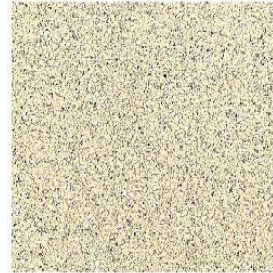

Every Plungie comes with an internal high-performance thermo polymer coating, ecoFINISH

ecoFinish is a highly engineered form of powder coating that's heated and applied onto the internal shell of the Plungie, forming a completely sealed, flexible, waterproof membrane that's both luxurious to the touch and highly durable.

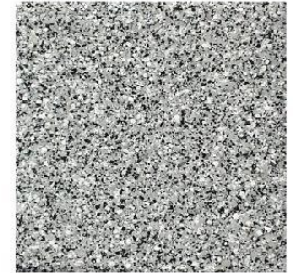

All six colours are available within standard pricing.

Delivery

Delivery

With incredibly low supply pricing and freight solutions, it's more cost-effective than ever to have a swim-ready Plungie delivered to your building site, ready for installation.

We have an exclusive partnership with America's leader in advanced precast concrete technologies, Forterra.

Because of this partnership, every Plungie is manufactured in an ISO 9001, 14001, and 45001 accredited facility and we know to the gram how much steel and concrete will be in your pool.
