

**Is your loved one living alone?  
Are you concerned? Stressed?  
Is a phone call, text, or visit,  
not enough to know how they  
are doing?**

**WE CAN HELP.**

## Camera Free, Non-Invasive Monitoring

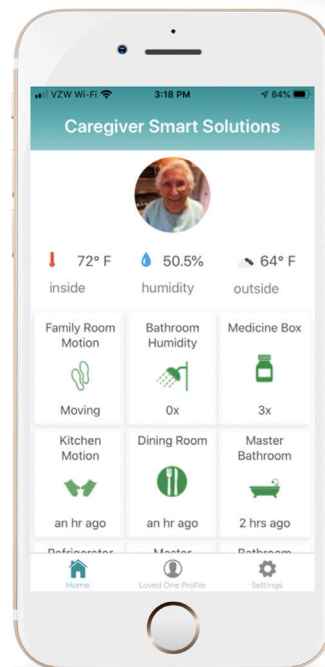

**1** Our small, non-intrusive sensors are placed discretely around the home. These sensors monitor your loved ones' activities and feed information to our app.

**2** Open the app to find data that shows whether your loved one is eating, sleeping normally and moving around. You'll also find insights for early detection of problems and can also see if there are changes in their eating, sleeping and activity patterns.

**3** Sensors also provide reliable fall detection, which may reduce the time it takes for you to know about and react to a catastrophic fall – even if your loved one is incapable of calling for help.

**4** Alerts are sent to the caregivers, which can be more than one person and The caregiver's history is maintained by the app which can also help answer questions from the doctor.

\* There is a monthly subscription fee

# Kit Options

**Caregiver Smart Solutions** combines the power of smarter technology and incredible data to empower caregivers impacted by the “Aging in Place” phenomenon. Our monitoring kits provide deep insights and peace of mind. Along with knowing how “Mom” is doing in her normal routine, **Caregiver Smart Solutions** allows caregivers to be ahead of potential concerns and knowing the answers when they ask, “How are you doing?”
