Discover Hybrid Heating

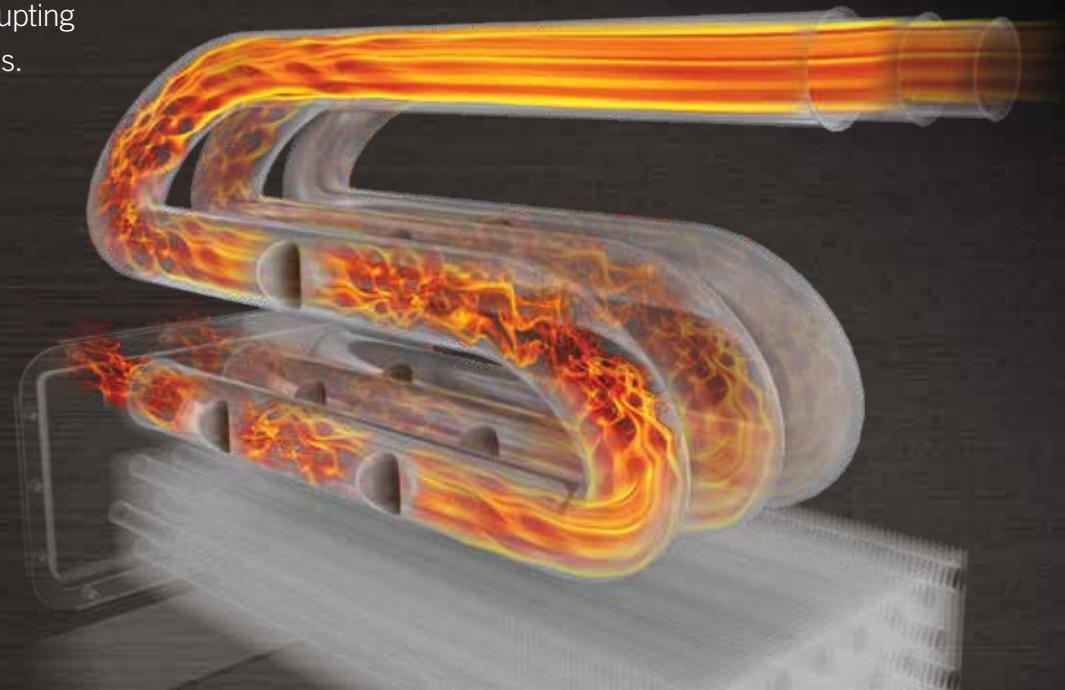

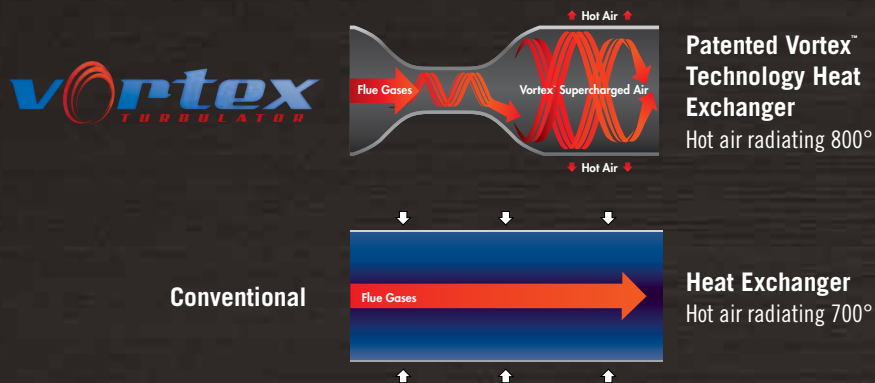

Adding a Napoleon Heat Pump and EQHub Smart thermostat to your Napoleon furnace creates the most EFFICIENT solution to heat and cool your home.

*Fuel usage and savings screen only available in Ontario

PATENTED VORTEX™ TECHNOLOGY.

Vortex™ turbulator inside the heat exchanger increases efficiency by disrupting the natural airflow which extracts the maximum heat from the flue gases.

THINK DIFFERENT. THINK NAPOLEON.

ULTIMATE 97% AFUE SERIES

The Ultimate 9700 Series Gas Furnace is the most stylish in the industry. Meeting all of your heating needs, the powerful two-stage system provides consistent and comfortable temperatures. For greater comfort and efficiency, the low-fire stage will provide for your heating requirements for most of its operation, reducing electricity consumption significantly. On colder days, this furnace supplies an extra boost of heat with the high-fire, second stage, creating fewer fluctuations in comfort levels. The WHISPER QUIET™ operation of the motor employs a 'soft start' and 'soft stop' which gradually increases and decreases speed, quietly introducing air and reducing noise. With automatic internal LED lights and a modular design, maintenance and service are incredibly easy. With the reliable heat and comfort that the 9700 provides, you will forget that it's cold outside.

FULL LIST OF FEATURES

- Up to 97% AFUE
- WHISPER QUIET™ Operation
- Modular Components
- Variable Speed Motor
- SureView Burner Window
- Patented Vortex Technology
- Two-Stage Heating
- FlexFit - Upflow, Right, Left
- FUEL TYPE** Natural Gas or Propane
- UV-C Technology Furnace Kit

WARRANTIES

10 Year Parts
Limited Warranty

15 Year Unit Replacement
Heat Exchanger Limited Warranty

Lifetime Heat Exchanger

ULTIMATE 96% AFUE SERIES

Napoleon's Ultimate 9600 Series Gas Furnace is one of the most stylish and efficient furnaces on the market and will meet all your heating needs. It's two-stage heating system uses the low-fire stage on milder days for greater efficiency throughout the heating season. During colder days, the furnace automatically switches to its second stage, high fire, to produce additional heat for your home. This effective two stage system is like having two furnaces in one. Napoleon's superior engineering and design guarantees consistent and comfortable temperatures throughout your home for many winters to come. With the 9600 Series furnace, you'll forget it's winter.

FULL LIST OF FEATURES

- Up to 96% AFUE
- WHISPER QUIET™ Operation

ESSENTIAL 2 STAGE 96% AFUE SERIES

Napoleon's Essential 9600Q 2 Stage Series Gas Furnace is the choice heating system for construction projects. The two-stage system creates a consistent, comfortable temperature throughout the home. The furnace will operate on the first, low fire stage for greater efficiency and comfort for most of the heating season. On colder days, the furnace automatically switches to the high fire, second stage producing additional heat. With modular components, it's easy to clean after the construction phase.

REST EASY

CLEAN AIR TECHNOLOGY

UVC AIR PURIFICATION

Napoleon's Ultimate 9700 Series features a UV-C air sanitization system that uses Philips UV-C technology to keep your home's air at its best by eradicating airborne contaminants like viruses, bacteria, and mold. UV-C technology is another defense against threats like coronaviruses and cold & flu season.

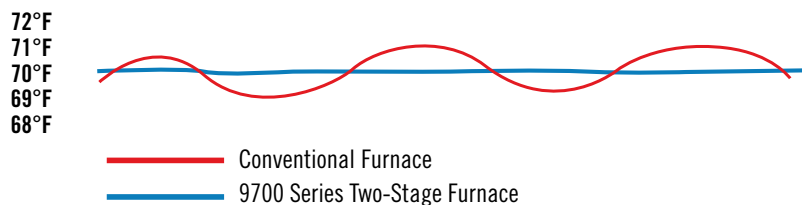

ENERGY EFFICIENT

TWO STAGE TECHNOLOGY

A two-stage furnace runs longer at lower capacity - 70% versus 100%. The system runs at 70% heating capacity on first stage for most of the year. This reduces electrical consumption of the blower motor as well as gas consumption, saving you money on utility bills.*

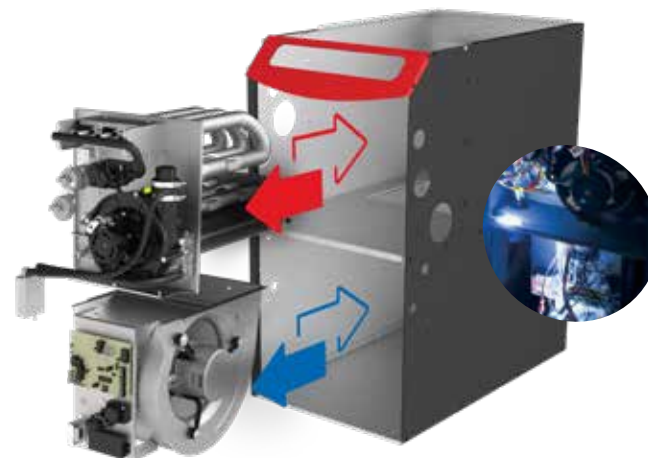

TWO-STAGE TECHNOLOGY DELIVERS EVEN CONSISTENT HEAT

MODULAR DESIGN

WITH INTERIOR CABINET LIGHTS

Napoleon's innovative modular design allows for easy handling, and cleaning. With a removable heat exchanger and blower compartment, servicing a Napoleon furnace is a whole new experience with LED lights inside the furnace cabinet that automatically turn on when the front panels are removed.
