

SAKURA

This handle is simple yet elegantly beautiful. The curve fits gently to your palm, giving a warm welcome like spring. Sakura gives the fine first impression the moment people grip the handle, leading them to enter an exquisite room behind the door. This beautifully designed handle resembles the infamous Japanese cherry blossom petal, Sakura, representing the nobleness and the new beginning.

SENSU

A traditional Japanese folding fan plays a vital role in Japanese society, from daily life, art performances to ceremonies. It symbolizes high social status, respect for each other, and a good luck charm for prosperity as it spreads out. Through this solid handle with beautiful inner lining, we want Sensu to welcome every guest with respect and hospitality from the moment they open the door.

Square

Round

Aquila

01

A column design gives the handle a symmetrical and elegant look. The grip part is designed with a perfect diameter to create comfort and safety for everyone.

Finish: **P** **PP** **SB** **AF**

Crux

02

A lever with a slim streamline and sharp silhouette for a pleasant-looking design and excellent operability. This is the perfect little touch to a room.

Finish: **P** **PP** **SB** **AF**

Draco

03

Provided with adequate thickness with its folded edges, this lever offers excellent operability, comfort, as well as an interesting design.

Finish: **P** **PP** **SB** **AF**

Fornax

04

The timeless and straightforward design lever. With an ideal thickness of grip and its round-shaped edge design to ensure comfort and safety for everyone.

Finish: **P** **PP** **SB** **AF** **PS**

Grus

05

A beautiful streamline runs over the comfortable grip resulting in a pleasant and sharp silhouette. This is the ideal lever in terms of aesthetic and functionality.

Finish: **P** **PP** **SB** **AF** **PS**

Musca

07

The design of this handle is inspired by the smooth curve of the bird's feather. The grip part is lightweight and easy to grip in, making it comfortable to use.

Finish: **P** **PP** **SB**

Pyxis

09

The curved streamline of this lever is reminiscent of the flow of water and wind. This lever is creating a contemporary and modern touch at the same time.

Finish: **P** **PP** **SB**

Volans

13

A lever with a unique-looking streamlined design. It is provided with an ideal thickness and convex-shaped design in the center of the grip, making it easy to grip.

Finish: **P** **PP** **SB**

Hydra

06

The vast surface and a rounded shape in both of the front edges create a gentle-looking and good operability for optimal use of the door.

Finish: **P** **PP** **SB**

Pavo

08

A lever with a convex design and ideal thickness on the grip part. The wide surface and gently rounded edge resemble smoothness and comfort.

Finish: **P** **PP** **SB**

Cygnus

11

This lever has thin yet enough weight on the grip part. Instead of a straight bar, it comes in a bit of convex composition to create the image of flexibility.

Finish: **P** **PP** **SB**

Sagitta

14

With a slightly bent shape, the user can recognize how the handle should be operated. Not only its easy operability, but this lever also offers a unique joint.

Finish: **P** **PP** **SB**

Norma

15

This edgy square-shaped lever creates a silhouette of sharp and solid lines, resulting in a touch of simplicity and modernity.

Finish: **P** **PP** **SB** **AF** **PS**

Delphinus

17

A balance combination of weight and diameter of the grip make this lever an ideal choice if you opt for a comfortably fit lever for frequent use.

Finish: **P** **PP** **SB** **AF** **PS**

Lupus

19

This lever consists of a thin gripping part and a rounded edge to create a slight accent. It provides a comfortable fit for everyone using it.

Finish: **P** **PP** **SB** **AF**

Lynx

23

This lever handle was born as a combination of a vast surface with a sharp line representing a vital characteristic of a modern design.

Finish: **P** **PP** **SB**

Bootes

16

This lever combines a cylindrical bar and a diagonal cut at the joint. Not only resembling a unique design, but it also offers excellent functionality.

Finish: **P** **PP** **SB** **PS**

Equuleus

18

The curved part in the edge creates a unique accent in this flat and slim-designed lever. The combination also results in an easy-grip lever for better operability.

Finish: **P** **PP** **SB** **AF**

Opiuchus

20

This lever creates a solid and sleek-looking as it combines a heavier weight and a wide flat front surface. The inner surface is convex, offering a unique combination.

Finish: **P** **PP** **SB** **AF**

Columba

24

Inspired by the beauty of the mountain's ridgeline, this design emphasizes the beauty and practical value by the comfortable gripping.

Finish: **P** **PP** **SB**
