Kuriki Manufacture Co., Ltd. is an ISO9001 certified manufacturing company focus on making architectural hardware and bathroom accessories, such as lever handle, hinged and sliding door fittings, toilet paper holder, towel bar, etc.

In more than 50 years, we are committed to helping everyone live In more than 50 years, we are committed to helping everyone live more comfortably by producing Japanese high-quality products. We understand that a good product does not only mean well-functioning. A good product should cover safety, universality, and aesthetically pleasing design. We always put our best effort into creating a product that can cover all of those fields, and several times now, our products have won the Good Design Award and achieved patents and utility models.

Until now, our bathroom lever handle still occupies the largest share in Japan, and the big residential developers here also widely adopt our products. But, most importantly, they have gained trust from the customers in the international markets. Our hotel lever, for example, is now used in well-known hotels, namely Swissotel the Stamford- Singapore, Village Hotel Sentosa- Singapore, The Outpost Hotel- Singapore, The Standard King Power- Thailand, Waldorf Astoria- Thailand. In the upcoming years, together with the growing number of customers, we will continue to be a leading manufacturer in providing hardware for residential and buildings

#### Icon guide

#### A Patent and Design Patent

The product has an exclusive right given for either utility or design patent.

#### Good Design Award

The product won the Good Design Award selected by Ministry of International Trade and Industry.

#### Rectangle Plate

The product has a rectangle strike plate and faceplate.

## Round Plate

The product has a round strike plate and faceplate.

## Load Capacity

The product is applicable on doors with a maximum weight shown in the icon.

#### Ooor Thickness

The product is applicable on doors with a specific door thickness shown in the icon.

## Screwdriver

The product can be installed easily using a screwdriver.

## No Tools

The product can be installed easily without using any tools.

## Water Resistant

The product can be used in the bathroom.

## Oigging Necessary

To install a product, you will need to drill or dig into the door, frame, wall, etc.

#### Adhesive Necessary

To install a product, you will need a suitable adhesive to combine parts.

#### Suild to Order

The product is not built until a confirmed order for the product is received.

## KURIKI, delivering safe and convenient products for everyone.

#### Concept

- Through different approaches in material, function, performance, design, and production cost, we provide high-quality products at an affordable cost.
- $\cdot$  All lever handles and lock cases have passed strict endurance tests.
- $\cdot$  Providing a wide range of designs to suit your living space.

#### Locks Function

#### Lock Cases Type

## FL (Backset 51)

Material: (Case)Steel (Front)Stainless Finishing: (Case)Chromate (Front)Hairline Faceplate: Rectangle, Round

## FR (Backset 51) A set of lock made of low-priced steel.

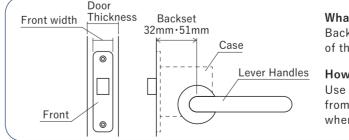

Material: (Case)Steel (Front)Stainless Finishing: (Case)Chromate (Front)Hairline Faceplate: Rectangle, Round

## KU (Backset 32) A set of lock case made of resin with a

soundproof features. Material: 〈Case・Front〉Resin Finishing: 〈Case・Front〉Pearl White Faceplate: Rectangle

## **FT** (Backset 51)

A tubular lock that is easy to install on the door.

Material: 〈Case〉ZDC 〈Front〉Stainless Finishing: 〈Case〉Chromate 〈Front〉Hairline Faceplate: Round

## FU (Backset 32, 51)

A set of lock made of stainless steel with excellent durability. Material: 〈Case · Front〉 Stainless

Finishing: (Case) Metal Fablic (Front) Hairline Faceplate: Rectangle

## LU (Backset 32)

A set of lock case made of resin with a soundproof features.

Material: 〈Case〉Resin 〈Front〉Stainless Finishing: 〈Case・Front〉Silver Faceplate: Rectangle

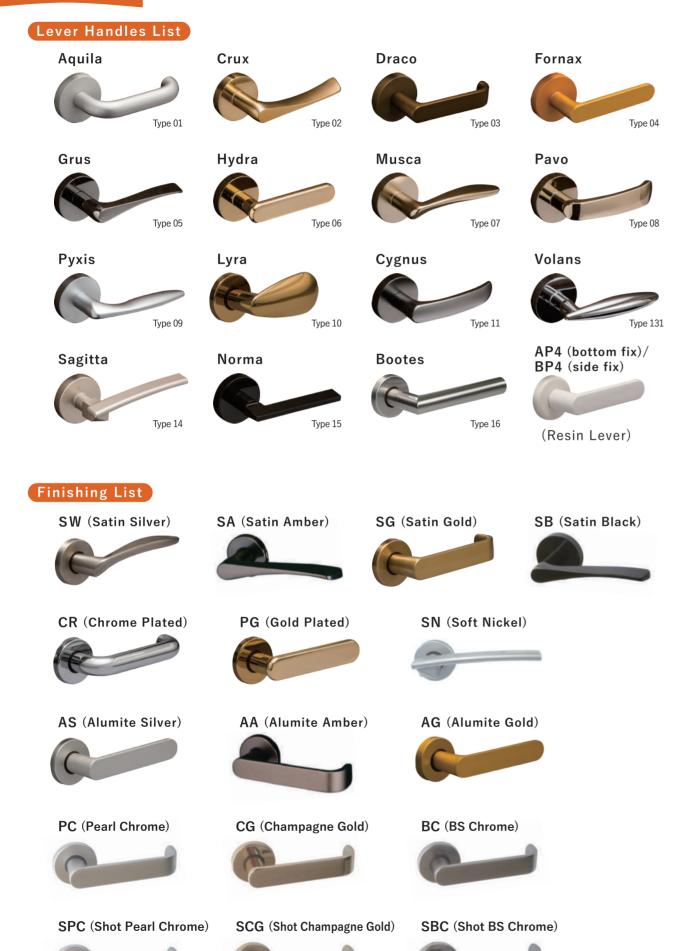

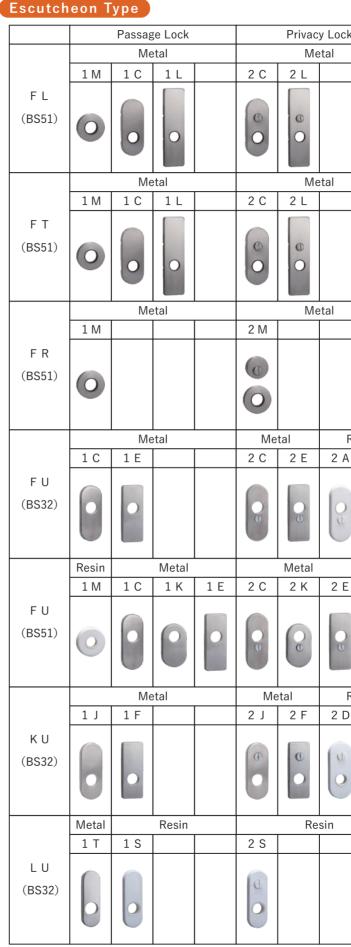

#### What is a Backset ?

Backset is the distance from the faceplate to the center of the lever handle or thumb turn installed on the door.

## How to measure the backset ?

Use a length measurement tool to measure the distance from the side edge of the door to the center of the hole where you put the lever handle or thumb turn on the door. ever Handles

The finishing color is adjusted to match the lever handle.

## Explanation of Right-Hand and Left-Hand

#### Kuriki Standard

We determine the right-hand or left-hand door by standing in the side of the door where you can see the hinges. If they are on your right side, then it is a right-hand door. Meanwhile, if they are on your left side, then it is a left-hand door.

Door

Hinged Door Soft Closer Patent

This door closer is suitable for indoor use, either on a new or an existing door. It helps to reduce the unpleasant noise of the door hitting the frame and prevent it from slamming shut. The door closer will decelerate the speed of the door at  $\pm$ 40 mm towards the end and automatically pull the door to close perfectly. The installation can be done easily using the attached pattern paper. Once installed, the closing speed can be adjusted. Compared to the other products, ours has outstanding durability as it has passed 500,000 times during the performance test.

Adjustable range: Up- down  $\pm 5$  mm, right- left  $\pm 5$  mm, front- back ±4 mm Material: (Main unit/ Spool bracket) Resin, Steel (Liner)Steel

Door Installation Liner

For installation, please use the manual and pattern paper attached to the product.

Concealed Hinged Door Closer

A concealed hinged door closer for indoor use provides the functionality of an overhead door closer but is fitted within the door leaf and frame. This product helps decelerate the speed of the door at  $\pm 100$  mm towards the end and self-closing itself slowly to reduce the unpleasant noise of the door hitting the frame and prevent pinched finger accidents. In addition, this type of installation is aesthetically pleasing and helps reduce vandalism, as most of the door closer is hidden from sight. Once installed, the closing speed can also be adjusted.

Material: (Main unit) ZDC (Spool bracket) Resin Load capacity: 30kg(297N) %Please contact us for 70kg(686N) pecifications.

#### Smart Door Stopper (Magnet Type)

Using a magnet with a strong force, this door stopper can hold a door open and helps eliminate any damage to the adjoining wall. The installation is effortless and can be fixed either on a new or existing door. The mounting screws are invisible, and the height of the floor-mounted part is only 3 mm making this product barrier-free. This door stopper also passed the 100,000 times performance test. Moreover, this product won the Good Design Award for its seamless and smart design while maintaining maximum functionality.

#### Doors Keeper (Magnet Type)

This door keeper uses a strong magnetic force that works well on a heavy door to stop it. Pushing the door once it is stopped will turn it into a lock position, and there will be no chance of it slipping and swinging through when opened. However, it will need a little to no effort to pull and close the door. The installation is effortless and can be fixed either on a new or existing door. In addition, the floor-mounted part is only 3 mm making this product barrier-free. This durable doorkeeper has also passed the 100,000 times performance test and won the Good Design award for its smart design while maintaining maximum functionality.

Concealed Type

This hinge is fixed in the top and bottom of the door. The design is slim, so it doesn't interfere with the design of the door. Once the bottom part is fixed, the upper part is easily set by pulling down the upper pin and put it back in place. Once installed, the front-back, right-left, up-down adjustment can be made easily using a screwdriver. This type of hinge is very durable as it has passed 200,000 operation tests, and it is also available in four high-quality finishing colors.

#### **Butt Hinge**

This standard type hinge consists of knuckles and leaves. The leaves use high-strength steel, and the hinge itself has passed 200,000 operation tests. Thus, this hinge has excellent strength and durability. In addition, the installation can be done easily as the leaves can be removed and then attached to the door and frame separately. The knuckles are also easy to insert and remove to ease the fixing process.

Material:Steel Load Capacity: 30kg(294N) When using 2pcs

Clear Cut Hook Lock

This hook lock for indoor sliding doors is good to prevent the door from accidentally being locked. It's impossible to operate the lock unless the door is hitting the trigger part and close perfectly. The product is universal as it can be configured with a standard lever or UD lever with a bigger grip so that everybody can use it easily. UD lever also uses blue and orange indicators, which is easier for anyone to recognize. The cylinder type uses a dimple key that provides 100 combinations, and there are 2 master keys available to generate 126 different child keys combinations. (Please contact us for further details.)

The lock is available in 4 different functions. The escutcheon is available in round and square types. The thumb turn is available in standard thumb turn type, standard lever type, and UD lever type. Available in 6 different colors to guarantee a perfect harmony with the different series of sliding doors.

**Euro Series** 

TS Hook Lock is a well-design product winning the Good Design Award. It combines a hook lock and a puller in one unit to be attached to an indoor sliding door. The lock-unlock operation can be done easily by sliding the

knob up and down (see fig. Detailed photo 1). It has a streamlined design and a vast surface with some textured parts to highlight a modern minimalist style. On cylinder type, a dimple key with 100 combinations is used to ensure safety. The strike plate is available with or without a trigger. and there are 6 different colors to complement any sliding door color.

Material: (Pull) ZDC (Lock Case, Strike) Stainless, Steel Door Thickness:28~36mm Strike Installation Range: Up-Down ± 5mm, Depth 3.5mm

#### With trigger

When the sliding door is open, the hook doesn't protrude. The trigger retracts into the case when the sliding door is closed.

#### NS Automatic Hook Lock

By adding up a magnet, this product not only can prevent the door from not closing perfectly or bouncing back. But it can also automatically lock the door by dropping the hook once the door is pulled to close entirely by the magnet force. Pull the puller to lift the hook, and the door will become moveable. The product without a lock is also

an option for your sliding door.

Top Hung Soft Closer Set

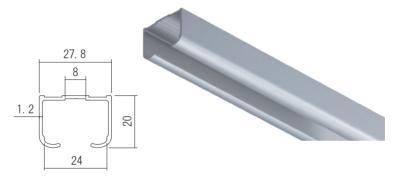

Made to be installed on an indoor sliding door, this top-hung damper will slowly pull the door from  $\pm$ 70 mm before it closes. Thus, it can reduce the unpleasant noise of the door hitting the frame. The door will close completely without any gap regardless of the strength or speed adjusted during the installation. This product has passed the 200,000 times operation test and comes with an adjustable roller, and wheels with bearing for optimal long-term performance. Not only offering excellent technical function, but this soft closer is also fully recessed to embraces a stylish architectural appearance. This top hung soft closer can be attached to both ends of the door. %1 %1 Please contact us for further details.

Anti-Shake Guide Pin

This pin helps the door running in the track, prevents it from swinging and shaking during opening or closing. When it collides with the door, the cylinder will spin, and the door will operate smoothly. Additionally, as it is concealed by the door, it doesn't interfere with the architectural appearance and causes no dangers for the user. 24

This product is a wall-mounted wooden handrail with different types of brackets. This series can be used as handrail support, but it can also be used as a toilet grab, which is ideal for those looking for a secure way to get on and off the toilet. The bracket's shape, the handrail's length, and the color option are available according to various scenes.
