AZEK® Building Products Announces Additions to its Complete Lineup of Fasteners for AZEK® and TimberTech® Decking at 2018 International Builder's Show

Number One Brand in Premium Decking Unveiling Advanced Decking Fastener Solutions

SKOKIE, IL— AZEK® Building Products, No. 1 in premium decking, is launching new fastening systems at the 2018 National Association of Home Builders' International Builders' Show from January 9th – 11th, 2018 in Orlando, Florida.

The company is announcing the launch of TOPLoc® for AZEK® Deck, designed specifically to work with the brand's lightweight, capped polymer decking. The TOPLoc for AZEK fasteners are high-quality, 305-grade, stainless steel screws with painted heads that pair with all AZEK decking colors. These fasteners are designed to help builders and contractors complete projects beautifully. TOPLoc for AZEK also comes with a Torx® ttap® drive system for wobble-free installation and is also available for the installation of AZEK® Fascia.

AZEK Building Products is also announcing a new development in FUSIONLoc™, a hidden fastening system designed for both AZEK and TimberTech grooved decking. FUSIONLoc™ offers both a fast installation, thanks to collated clips, and a strong connection, due to three points of connection. Originally developed for a pneumatic installation, AZEK Building Products now adds a hand driven option, only requiring a small guide and a drill for a fast, powerful installation.

Cortex® is a fastening system that uses plugs made from AZEK and TimberTech decking to hide a screw driven below the deck surface, and it is a great solution for perimeter and stair boards, among other uses. It features a high-quality, ACQ approved, specialty deck screw with a TORX® ttap® drive system, offering a wobble-free installation. New in 2018, AZEK Building Products is adding collated Cortex plugs that pre-align the grain on the plug, saving the installer time and effort.

"It's important that the homeowner is completely satisfied when making such a big investment, so we arm our contractors with a variety of innovative solutions to achieve exactly what the homeowner wants, while making installation as easy as possible," said Patrick Barnds, SVP at AZEK Building Products. "We are constantly investing in materials science and engineering our product lines that will appeal to homeowners and contractors, alike. Our new fastening options for our quality premium decking should help contractors close more deals."

All AZEK Building Products fasteners come with 25-year limited warranties. To see them, visit booth #W6371.

About AZEK® Building Products:

AZEK Building Products, a division of The AZEK® Company, is a leader in the development of premium, low-maintenance exterior building products. Available to a worldwide audience, our product lines span AZEK® Deck, Rail, Trim, Moulding, Porch, Pavers, and Adhesives, as well as capped wood composite decking and railing under the TimberTech® name. Both brands, synonymous with quality and innovation and made in America, lead their market areas by continually reinventing product lines and redefining entire product categories.
