## ***This Old House* on PBS-TV Features CAMO® Tools and Fasteners to Speed Up Deck Installation in the 1880s Concord Country Cape**

Grand Rapids, MI -- National Nail®'s CAMO® brand announces its system of tools and hidden deck fasteners were used by Silva Brothers Construction for the deck renovation of their 1880s Concord Country Cape on *This Old House*. Initially airing January 13, 2022, Episode 4314 titled "Sunshine Power" features a MoistureShield capped composite deck installed with the CAMO deck fastening system.

*This Old House* airs Thursdays at 8 p.m. on PBS but check local listings [here](#) and enter your zip code for the exact time in your area. Full episodes are also available online the Sunday night after each episode's original airdate [here](#). You can also watch recent episodes on PBS.org, PBS digital apps, The Roku Channel, and on the *This Old House* app.

Silva Brothers Construction built the home's new deck using CAMO Universal Deck Clips, LEVER® tools and the new ClipDRIVE™. Designed for fastening grooved deck boards, CAMO Universal Deck Clips require no partial installation, allowing builders to place rows of clips and boards and fasten in a single pass. The LEVER tool clamps onto the joist to lock decking and clips in place in just one turn, freeing contractors' hands to fasten. The ClipDRIVE stand-up fastening tool features a height-adjustable handle for improved ergonomics, allowing deck builders to stand comfortably while fastening up to 5X faster than traditional methods.

"We are thrilled to see CAMO tools and fasteners on *This Old House*, the iconic show that started homeowners' love affair with their homes," said W. Scott Baker, CEO, National Nail. "When you have a tight schedule on a TV film set, I can't think of a better way to get it done than with the CAMO tool and fastener system."

Like all CAMO products, CAMO Universal Deck Clips, LEVER and ClipDRIVE are backed by a CAMO Warranty for use with leading deck boards so you can confidently use them on every install. Learn more at [www.camofasteners.com](http://www.camofasteners.com).

### **About CAMO**

CAMO exists to provide the best deck fastening installation experience for hardworking doers who take pride in their work and value their wallet. That's you. Whether you install decks for a living, offer to help build them with a buddy, or maybe build just one in your lifetime, CAMO products are engineered to save you time and ensure your work looks and performs as you expect it should.
