Rich Finishes, Exciting Designs Highlight Progress Lighting Collections at 2023 International Builder's Show

GREENVILLE, S.C., DATE, 2022 – Balancing on-trend and timeless design elements, the Progress Lighting new product launch delivers lighting fixtures and ceiling fans specifically tailored to the builder market, supporting builders with the style, quality and performance they expect. The Progress Lighting launch will be on display at Booth C1819, January 31 - February 2, 2023, at the NAHB International Builders Show at the Las Vegas Convention Center, Las Vegas, NV.

"Home buyers and remodelers are interested in how they can customize a home to their taste, and lighting is an easy way to personalize a home. Progress Lighting's large selection of fashion-forward yet attainably priced lighting designs offer choices while continuing to deliver the quality and performance required by our interior designers and home builder clientele," says Colleen Visage, Vice President of Product Development. "Our Winter 2023 launch introduces exciting combinations of materials, rich finishes and fresh styles that elevate our design-driven collections to a new level of livable luxury."

The Progress Decorative Lighting category presents a fresh approach to classic design, with lighting that is key to establishing ambiance and reinforcing a space's design elements. Warmer finish colors continue to reign, with lighting and fans in soft gold and brass finishes, brushed nickel, washed wood tones and matte black that blend well with décor styles from modern to urban industrial to farmhouse.

Lighting Design Standouts

The **Goodwin** collection features a clean design that seamlessly blends with modern decor. Angular, crisp lines highlight the frame's contemporary profile. Expanding the family from its

successful wall and vanity light styles, the Goodwin family includes a chandelier, semi-flush mount convertible fixtures, foyer lights and mini pendants featuring white linen or clear glass shades.

Gilliam ceiling lights deliver an ethereal quality expressed by their slim circular silhouette. Simply elegant in design, the chandelier creates an airy feeling in any room, while clear curved glass shades enhance the foyer light's classic form with simple elegance.

Showcasing understated elegance, the **Cofield** collection features a slender, clean design. Pendants, flush mounts and vanity lights feature lamp bases surrounded by an elegant etched white cylindrical shade, providing a contemporary style to many interior settings.

LED Mirror Launch

Flawless function and fashion combine in a luxe addition to modern bathrooms with the Progress Lighting **Captarent** Illuminated Mirrors. Offered in round, oval and square silhouettes, frosted LEDs highlight the profile of the mirror, creating a captivating aesthetic and providing a balanced wash of innovative LED illumination.

Striking Exterior Collections

The Outdoor Lighting category presents exterior collections that complement today's striking home facades. **Walcott** lanterns combine a stately elegance with modern style from its distinctive vertical frame glazed with clear glass panels. For lovers of rustic elegance, **Wakeford** offers a nostalgic look with modern sophistication. A cross brace design contrasts against the textured glass panes for a vintage look that fits well with rustic and traditional exteriors.

Ceiling Fans Style

In the ceiling fan category, the **Upshur** ceiling fan offers a contemporary style through a distinctive design and a quiet and efficient D.C. motor. A wire-formed cage adds a touch of casual style to **Freestone**, along with reversible plywood fans and an LED light kit. **Trevina IV** features updated modern styling and efficient LED lamping to create cool, cost-saving breezes for fans that are ideal for the builder market.

LED Functional Introductions

Our **Surface Mount Cylinder Collection** fixtures have a clean, modular styling and a swivel head design that casts crisp, multi-directional light. Offered as integrated 3000K LED, A19 or PAR 20 lamping options, these wall-mounted, low-profile fixtures are adjustable and can be used as a standard downlight, accent light, wall wash or sloped ceiling light.

The new Progress Lighting introductions will be available at lighting showrooms, online retailers, and the Progress Lighting website, www.progresslighting.com.

About Progress Lighting

Design inspiration, quality products, and innovative technology have been at the heart of Progress Lighting's success since 1906. They are why Progress has earned its reputation as the #1 decorative lighting line among professional trades, home builders, specifiers, and architects. Progress offers a selection of more than 5000 beautifully designed lighting fixtures for the home, including our Design Series collection of artistically influenced lighting. Headquartered in Greenville, S.C., Progress Lighting has distribution centers throughout the country that support one of the largest networks of lighting showrooms and electrical distributors in the United States.
