## CEDIA Technology Solutions Pavilion

**Design & Construction Week®** (DCW), the co-location of the NAHB International Builders' Show® (IBS) and NKBA's Kitchen & Bath Industry Show® (KBIS), will be held January 9–11 in Orlando, FL. For the second straight year, the IBS show floor will feature the **CEDIA® Technology Solutions Pavilion** designated specifically to showcase exhibitors who specialize in technology solutions for the home.

**Connect your customers** to better kitchens, baths and connected homes by developing **new partnerships** and discovering the **latest in home automation**. Don't miss your opportunity to explore this new home technology destination at DCW 2018!

*"Being able to work with NAHB and NKBA at DCW again is a fantastic opportunity to showcase the numerous technology innovations that are available to home builders and home buyers. DCW will also help to build an awareness and understanding of how CEDIA technology integrators and building/design professionals can work together to create homes that are luxurious, entertaining, safe, and efficient".*

—Tabatha O'Connor, CEDIA Interim President and CEO
